# Machine Vision Automation

Our  
Systems

**Scorpion Vision UK is a provider of machine vision systems for factory automation.**

We work with machine builders to deliver robust and reliable imaging based automation solutions. We have a strong track record that goes back to the establishment of Scorpion Vision in the UK in 2004. Our customer base is broad and our application reference list is varied.

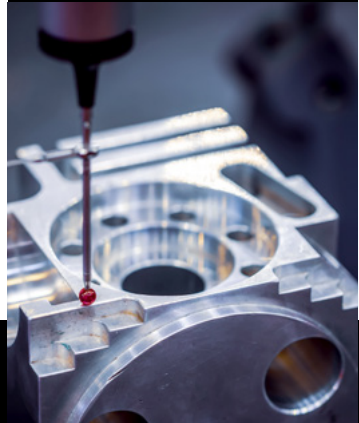

## Quality Control

Using Machine vision  
Technology

Provided by the leading provider  
of industrial automation  
systems

## Non-contact Measurement

High Accuracy world class  
calibration tools

Measuring sub-pixel, down to  
micron level

# Components for Machine Vision

Buy  
Online

**Buy leading industrial camera brands online at the Scorpion Vision webshop.**

- Save money by purchasing accessories at the same time
- Get expert help from our imaging experts without obligation
- Use our lens and camera selector interactive web tools
- Take advantage of our sale or return policy for camera evaluation

Our  
Products

**Why not speak to our experts online and get instant help so you can make informed decisions. We sell:**

- USB3 and GigE Vision Cameras
- M12 and C Mount optics
- Miniature Camera modules
- Optical and cabling accessories
- Open Platform Smart Cameras
- Value for Money LED Illumination

# Robot Vision

Our  
Expertise

**Scorpion Vision is widely deployed in robotic guidance and is brand agnostic, so we have many cross platform robot vision systems deployed globally.**

In the UK, we have extensive experience with ABB, Staubli, Mitsubishi and Kuka, with a demonstrable track record of many successful installations.

We are often the machine vision provider of choice when it comes to advanced 2D robot vision and one of the few providers of a competent and universal 3D robot guidance system.

# Finding the right solution for you

## Our Values

### **Expertise**

Sound advice  
Technology driven solutions

### **Value**

Low cost to high end  
OEM Pricing structures

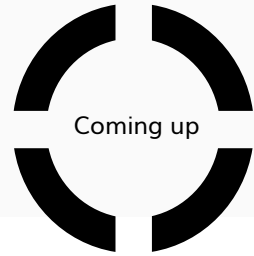

### **Quality**

- Leading brands
- Impartial recommendations

### **Service**

- Evaluation stock
- Technical support

# Keep up to date with Scorpion Vision

## UKIVA Machine Vision Conference 2019

Following the great success of previous years, Scorpion Vision will be attending this year's Machine Vision Conference held at the Marshall Arena in Milton Keynes on the 6th June 2019.

The Scorpion Vision stand will be showcasing the Scorpion 3D Venom Camera which is capable of 1 micron measurements.

There will be several presentations going on throughout the day, Paul Wilson will be discussing picking and de-palletising application for large objects, Thor Vollset will be talking about a new Scorpion 3D Stinger innovation form Tordivel targeting OEMs. HIK Robot - a Scorpion

Vision partner will also be attending and presenting machine vision solutions in logistics.

All in all, this year's Machine Vision Conference is set to be bigger and better than ever and we hope to see you there

Please visit [www.machinevisionconference.co.uk](http://www.machinevisionconference.co.uk) for free delegate registration.

## New Products

New to Scorpion Vision's camera portfolio are embedded camera products. There are two product groups, embedded cameras designed for compatibility with Jetson TX1/ TX2 platform and a range of embedded camera modules with compatibility with Raspberry Pi which means that Raspberry Pi users have a much larger range of imaging devices available to them beyond the standard offerings.

We have also recently added the Hikvision S-Mount Board Level camera to our Machine Vision Industrial Camera range.

These cameras are a versatile device that can be used in a variety of applications, such as; electronic semiconductor, factory automation and quality inspection. We have a wide range of 1/1.8" and 2/3" M12 lenses which when paired with the S-Mount Board Camera, provides a very cost effective imaging solution.
